Verification report of Greenhouse Gases emissions Scope 1 and 2 and Energy indicators

This verification Report is addressed to Amphenol.

Request, Responsibilities and Independence

Following the request made to us by Amphenol, we have verified environmental indicators related to the emissions of greenhouse gases (GHG) and to the energy consumption for Amphenol.

It is the responsibility of Amphenol to prepare and report those indicators in accordance with Amphenol reporting procedures, hereinafter referred to as "the reporting procedures".

It is our responsibility to audit the reporting process and those indicators so that we can formulate an opinion.

We conducted our audit work in an impartial and independent manner, in accordance with the professional practices of the independent third party, based notably on the principles of ISO 14065, ISO 14064-3 and in application of the Code of Ethics applied by all parties involved in Bureau Veritas Certification's work. This Assurance Statement applies to the related information included within the scope of work described below.

Bureau Veritas Certification's responsibilities were to:

- obtain reasonable assurance about whether the Selected Information has been prepared in accordance with the Reporting Criteria.
- form an independent conclusion based on the assurance procedures performed and evidence obtained; and
- report our conclusions to the management of Amphenol.

Nature and scope of work

The scope of our work covered the following indicators reported by Amphenol for the period 1st January to 31st December 2025 and related to the greenhouse gases (GHG) emissions scope 1 and 2, and the energy consumption (the 'Selected Information'):

- o Total energy consumption: 1 292 978 MWh
- o GHG emissions scope 1 : 69 049 t CO₂ eq
- o GHG emissions scope 1 and 2 calculated:
 - with electricity market-based calculation: 419 128 t CO₂ eq or
 - with electricity location-based calculation: 614 149 t CO₂ eq

The scope of the reporting covers all worldwide activities for which there exists a physical manufacturing location that the company has operational control over, regardless of whether the facility is leased or owned. Manufacturing includes any added-value activity which is not strictly warehousing or sales offices.

In order to issue a reasonable assurance opinion on this information, we performed our audit work in accordance with our internal methodology, for the verification of data, in particular:

- ✓ we have taken note of the scope of consolidation to be considered for the preparation of those indicators. We checked that those indicators cover all the companies included in the scope of consolidation specified;
- ✓ we gathered the information required for an understanding of the Company's activities, the context in which the Company operates, and the environmental consequences of its activities;

In detail, our audit work was as follows:

- ✓ we ensured that the Company has put in place collection processes aimed at ensuring the reliability and the consistency of the indicators reported. We examined the “reporting procedures” with regard to their relevance, understandability and completeness and, where applicable, taking into account good professional practices;
- ✓ we identified the persons within the Company who are in charge of all or part of the reporting process and we conducted interviews with some of these persons;
- ✓ we inquired about the existence of internal control and risk management procedures set up by the Company;
- ✓ we assessed, on a sample basis, the implementation of the “reporting procedures”, in particular the processes for collecting, compiling, processing and auditing information;
- ✓ In order to verify the indicators, we:
 - selected a sample of contributing entities within the scope of consolidation, based on their activity, their contribution to the Company’s consolidated data, their location and the results of work carried out during the previous year,
 - performed on site audits¹,
 - o 51 % of total energy consumption and
 - o 49 % of scope 1 and 2 total GHG emissions (electricity market-based) or 53 % of scope 1 and 2 GHG emissions (electricity location-based)
 - carried out detailed tests on a sample basis checking the correct application of “reporting procedures”, reconciling data with supporting documents, checking calculations and the consistency of results.

We also tested the robustness of the data verification process carried out by the team in charge of consolidation, in particular by performing sample checks on the verification of various data, by ensuring the proper application of the verification process in place and the traceability of these internal verifications and the action taken if any discrepancies were identified.

Reporting criteria

Amphenol has written and implemented a guidance to provide instructions for reporting on the ENVIRONMENT & GOVERNANCE indicators used within Amphenol's Sustainable Development Reporting System (SDRS). The key procedures are “Corporate Sustainability Reporting - Guidance for Measuring and Reporting - Part 1 – Environment & Governance”.

¹**USA** (Wallingford HQ Site, Sidney (AAO) ; Nashua (APC-HQ); Springfield (PIMO-Eldon) **India** (Pune (AII); Cochin (AFCI); Bangalore (AII/HSIO/TMS); **Mexico** (Nogales (Gran Azteca) - MAO/AAO; Amphenol Carlisle Interconnect Technologies (ACIT); Mexicali Amphenol TCS de Mexico S.A. de C.V. (TCS-Mexico & ABSI); **China** : Amphenol FCI Connectors Dongguan Ltd (AFCI DG) Dongguan AFCI; Haiyan (AJET-HY)/ Amphenol JET (AJET) [Hangzhou & Haiyan]; Haiyan (SAA-HY); FCI NanTong Ltd. (AFCI NT) Nantong (AFCI); Changzhou (AACS) / Amphenol Automotive Connection Systems (Changzhou) Co., Ltd. (AACS); Chengdu (ACPCD) / Amphenol Commercial Products (Chengdu) Co. Ltd. (ACPCD); Huzhou (APAJ); Shenzhen (ASCA) / Amphenol High Speed IO Connectors (HSIO) [Shenzhen], Amphenol East Asia Electronics Technology (Shenzhen) Co. Ltd. (ASCA); Dongguan (ACMT) Carlisle Medical Technologies (Dongguan) Co., Ltd; Xiamen (AST-XM) Amphenol AssembleTech (Xiamen) Co., Ltd.; Shanghai (ATMC) Amphenol Times Wave Electronics (Shanghai) Co., Ltd.; Shenzhen (Kai Jack) / Amphenol Kai Jack (Shenzhen) Co. Ltd. (RFA); Shenzhen (ASCA) / Amphenol High Speed IO Connectors (HSIO) [Shenzhen] Amphenol East Asia Electronics Technology (Shenzhen) Co. Ltd. (ASCA); Zhuhai (ATZ) /Amphenol Technology Zhuhai (ATZ-P); **Korea** (Pyeongtaek-si (ADVS); **Malaysia** (Penang (ATCS) ; Penang (PCO));**Germany** (Pirna FEP; Koenigstein (Ehlich)); **UK** (Tamworth (Invotec))

Limitations and exclusions

Excluded from the scope of our work is verification of any information relating to:

- Activities outside the defined verification period;
- Activities outside the scope;
- Tenants: A tenant is a non-Amphenol organization, a person, or a business that uses part of the premises (a floor, a warehouse, a separate building or land) and pays rent to the reporting site. The footprint of non-Amphenol tenants within the boundaries of the entity is excluded. Electricity and water bills, waste generation, etc. supported by these tenants are henceforth excluded from the data reported by the site.

Our verification is risk-based, drawing on an understanding of the risks associated with calculating GHG emission and energy indicators and the controls in place to mitigate these risks. Our examination included assessment, on a limited sample basis, of evidence relevant to the reporting of emission and energy information.

Observations on reporting procedures or the content of the information

Without calling into question the conclusions below, we make the following observations:

Findings related to scopes 1 and 2 and identified during the audit were not closed but none of those was deemed significant. As they relate to different data sources, they cannot be easily summarized here.

An improvement opportunity is to make sure that, wherever applicable (eg China), evidence of cancellation of green certificate is provided.

Reasonable assurance statement

On the basis of our methodology and the activities described above, we have conducted a verification of the data relevant for greenhouse gases (GHG) emissions scope 1 and 2, and energy consumption (the 'Selected Information') reported by Amphenol. On the basis of the verification work undertaken these data are fairly stated.
